

The American Academy of Insurance Medicine presents
The Triennial Course in Insurance Medicine

February 27 – March 4, 2000
The Westin Mission Hills Resort
Rancho Mirage, California

The Triennial Course offers an intensive, up-to-date review course of Insurance Medicine once every three years, with a primary emphasis on small group workshop sessions that are enhanced by selected platform presentations. The entire faculty consists of experienced insurance medical directors who have been chosen for their ability to understand, and teach directly to, the practical medical underwriting needs of attendees. Because the total attendance is limited to 130, all workshops are small and the quality of learning is maximized.

While the majority of attendees are medical directors with varying levels of industry experience, this course also offers an outstanding opportunity for underwriters & RNs who desire to comprehensively enhance their medical underwriting knowledge base.

Triennial 2000 Program:
